beni-suef, Egypt

ITI

4-Month Professional Diploma

Information Technology Institute

Software Development - Frontend and Cross platform

04/2024 – 11/2024

Fayoum, Egypt

(depi) - Internship

6-months Internship Digital Egypt Pioneers Initiative

Software Development _Frontend Developer

Skills

HTML , HTML5

CSS , CSS3

Bootstrap , Sass

Git , Github

JavaScript , ES6

TypeScript

Angular

Soft Skills :

Basics of React

- Communication
- Presentation Skills.
- Fast Learner and Searcher
- Time Management
- Negotiation
- Personal Branding

Projects

Movies web

I've contributed to a movie browsing application using Angular, integrating The Movie Database (TMDB) API to provide users with up-to-date information on popular, top-rated, and upcoming movies.  Key Features: Real-time Data: Fetches the latest movie details from TMDB. Responsive Design: Ensures a seamless experience across devices. Modular Architecture: Built with Angular CLI for scalability and maintainability.  This project allowed me to deepen my understanding of Angular's capabilities and enhance my skills in API integration and responsive web design.
